Let L denote the maximum length of the lists.

1. brute force. $O(n^2 L)$.
2. use bit packing. $O(\frac{n^2 L}{w})$.
Submission Detail

55 / 55 test cases passed.

Runtime: **92 ms**
Memory Usage: **48 MB**

Status: **Accepted**

Submitted: **0 minutes ago**

Accepted Solutions Runtime Distribution

Runtime: 92 ms, faster than 100.00% of C++ online submissions for People Whose List of Favorite Companies Is Not a Subset of Another List.

Memory Usage: 48 MB, less than 64.63% of C++ online submissions for People Whose List of Favorite Companies Is Not a Subset of Another List.
